Project Overview

Discovery High School is a ground-up facility, designed by DLR Group, delivering project-based learning to 9th through 12th grade students. The school centers on collaborative, integrated learning teams with a STEAM focus. This 89,000 sq. ft. facility features flexible and adaptable learning spaces intended to provide an alternate education option for 600 students within the Camas School District. DLR Group featured the award-winning and compact JumpSeat for the Learning Stair, which is the centerpiece of the school.
